Establishment—recurrent expenditure (visiting medical officer payments)

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 269520

Registration status: Health, Standard 01/03/2005

Definition: All payments made by an institutional health care establishment to <u>visiting</u>

medical officers for medical services provided to hospital (public) patients on an

honorary, sessionally paid, or fee for service basis.

A visiting medical officer is a medical practitioner appointed by the hospital board

to provide medical services for hospital (public) patients on an honorary, sessionally paid, or fee for service basis. This category includes the same

Australian Standard Classification of Occupations codes as the salaried medical

officers category.

Context: Health expenditure:

This is a significant element of expenditure for many hospitals (although not for other establishments) and needed for health financing and health expenditure analysis at the national level. Any analysis of health expenditures at the national level would tend to break down if significant components of expenditure were not

available.

Object Class attributes

Identifying and definitional attributes

Object class: <u>Establishment</u>

Definition: Institutions, organisations or the community from which health services are

provided. The term establishment covers conventional health establishments and

also organisations which may provide services in the community.

Specialisation of: Organisation

Source and reference attributes

Origin: National Health Data Committee

Property attributes

Identifying and definitional attributes

Property: Recurrent expenditure

Definition: Expenditure which does not result in the acquisition or enhancement of an asset.

Property group: <u>Financial characteristics</u>
