**Definition:** The date of birth of the person.

**Context:** Required for a range of clinical and administrative purposes.

Date of birth enables derivation of age for use in demographic analyses, assists in the unique identification of clients if other identifying information is missing or in question, and may be required for the derivation of other metadata items (e.g. the diagnosis related group for admitted patients).

## Object Class attributes

### Identifying and definitional attributes

<b>Object class:</b>	<a href="#">Person</a>
<b>Definition:</b>	A human being.

### Collection and usage attributes

**Comments:** Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are not exclusively male or female.
