Episode of admitted patient care—intended length of hospital stay

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	269574
Registration status:	Health , Standard 01/03/2005 Tasmanian Health , Standard 05/09/2016
Definition:	The intention of the responsible clinician at the time of the patient's admission to hospital or at the time the patient is placed on an elective surgery waiting list, to discharge the patient either on the day of admission or a subsequent date.
Context:	Admitted patient care: To assist in the identification and casemix analysis of planned same-day patients , that is those patients who are admitted with the intention of discharge on the same day. This is also a key indicator for quality assurance activities.

Object Class attributes

Identifying and definitional attributes

Object class:	Episode of admitted patient care
Definition:	The period of admitted patient care between a formal or statistical admission and a formal or statistical separation , characterised by only one care type.
Context:	Admitted patient care.
Specialisation of:	Service episode

Collection and usage attributes

Guide for use:	This treatment and/or care provided to a patient during an episode of care can occur in hospital and/or in the person's home (for hospital-in-the-home patients).
-----------------------	---

Source and reference attributes

Origin:	Health Data Standards Committee.
----------------	----------------------------------

Property attributes
