

# Episode of admitted patient care—diagnosis related group

<b>Metadata item type:</b>	Data Element Concept
<b>METEOR identifier:</b>	269660
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Standard 01/03/2005</li><li>• <a href="#">Tasmanian Health</a>, Standard 06/09/2016</li></ul>

**Definition:** A patient classification scheme which provides a means of relating the number and types of patients treated in a hospital to the resources required by the hospital.

## Object Class attributes

### Identifying and definitional attributes

<b>Object class:</b>	<a href="#">Episode of admitted patient care</a>
<b>Definition:</b>	The period of admitted patient care between a formal or statistical <a href="#">admission</a> and a formal or statistical <a href="#">separation</a> , characterised by only one care type.
<b>Context:</b>	Admitted patient care.
<b>Specialisation of:</b>	<a href="#">Service episode</a>

### Collection and usage attributes

**Guide for use:** This treatment and/or care provided to a patient during an episode of care can occur in hospital and/or in the person's home (for [hospital-in-the-home](#) patients).

### Source and reference attributes

**Origin:** Health Data Standards Committee.

## Property attributes

### Identifying and definitional attributes

<b>Property:</b>	<a href="#">Diagnosis related group</a>
<b>Definition:</b>	A resource utilisation classification based on diagnosed conditions, usage of hospital resources, and demographic characteristics of the patient.
<b>Context:</b>	The development of Australian refined diagnosis related groups has created a descriptive framework for studying hospitalisation. Diagnosis related groups provide a summary of the varied reasons for hospitalisation and the complexity of cases a hospital treats. Moreover, as a framework for describing the products of a hospital (that is, patients receiving services), they allow meaningful comparisons of hospitals' efficiency and effectiveness under alternative systems of health care provision.
<b>Property group:</b>	<a href="#">Service provision event</a>
