# Establishment—number of group session occasions of service for non-admitted patients

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element Concept
<b>METEOR identifier:</b>	269674
<b>Registration status:</b>	<a href="#">Health</a> , Standard 01/03/2005
<b>Definition:</b>	The number of non-admitted group session occasions of service provided by an establishment.
<b>Context:</b>	Required to adequately describe the services provided to non-admitted patients.  The resources required to provide services to groups of patients are different from those required to provide services to an equivalent number of individuals. Hence services to groups of non-admitted patients or outreach clients should be counted separately from services to individuals.

## Object Class attributes

### Identifying and definitional attributes

## Data element concept attributes

### Collection and usage attributes

<b>Comments:</b>	A group is defined as two or more patients receiving a service together where all individuals are not members of the same <b>family</b> . Family services are to be treated as occasions of service to an individual.  In general, establishments other than acute hospitals provide a much more limited range of services for non-admitted patients and outreach/community patients/clients. Therefore, disaggregation by type of non-admitted patient care is not relevant to alcohol and drug hospitals.
