Episode of care—inter-hospital contracted patient status

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	269715
Registration status:	Health , Superseded 05/10/2016
Definition:	An episode of care for an admitted patient whose treatment and/or care is provided under an arrangement between a hospital purchaser of hospital care (contracting hospital) and a provider of an admitted service (contracted hospital), and for which the activity is recorded by both hospitals.
Context:	Admitted patient care: To identify patients receiving services that have been contracted between hospitals. This metadata item is used to eliminate potential double-counting of hospital activity in the analysis of patterns of health care delivery and funding and epidemiological studies.

Object Class attributes

Identifying and definitional attributes
