Establishment—recurrent expenditure (indirect health care)

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	269719
Registration status:	Health , Standard 01/03/2005
Definition:	Expenditures on health care that cannot be directly related to programs operated by a particular establishment (that is, can only be indirectly related to particular establishments).
Context:	Health expenditure: To improve and substantiate financial reporting in relation to indirect health care expenditure and assist in understanding differences in costs for similar establishments in different States and regions, due to differences in the extent to which support services and other services to residents/inpatients and outpatients of establishments may be provided by the establishment itself or by other bodies.

Object Class attributes

Identifying and definitional attributes

Object class:	Establishment
Definition:	Institutions, organisations or the community from which health services are provided. The term establishment covers conventional health establishments and also organisations which may provide services in the community.
Specialisation of:	Organisation

Source and reference attributes

Origin:	National Health Data Committee
----------------	--------------------------------

Property attributes

Identifying and definitional attributes

Property:	Recurrent expenditure
Definition:	Expenditure which does not result in the acquisition or enhancement of an asset.
Property group:	Financial characteristics

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
Reference documents:	Australian Bureau of Statistics: Government Finance Statistics 1998, Cat. No. 5514.0
