Income unit—income unit identifier

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 269818

Registration status: Housing assistance, Superseded 10/02/2006

Definition: A unique identifier (within a household) assigned to an income unit that is either

seeking assistance and/or receiving assistance.

Context: Income units are one of the main counting units in housing assistance data and as

such it is essential to be able to uniquely identify them.

Object Class attributes

Identifying and definitional attributes

Object class: <u>Income unit</u>

Definition: One person or a group of related persons within a household, whose command

over income is shared, or any person living in a non private dwelling who is in

receipt of personal income.

Context: Income units are restricted to relationships of marriage (registered or de facto) and

of parent/dependant who usually reside in the same household. This means that

an income unit can be defined as:

a married couple or sole parent, and dependent children only

a married couple only with no dependent children present

a person who is not related to any other household member either by

marriage or by the parent/<u>dependant</u> relationship.

This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and

families.

Specialisation of: Person/group of persons
