

Establishment—gross capital expenditure (accrual accounting) (equipment)

Metadata item type: Data Element Concept

METEOR identifier: 269904

Registration status:

- [Health](#), Standard 01/03/2005

Definition: Expenditure in a period on the acquisition or enhancement of equipment.

Context: Health expenditure:

Gross capital expenditure is a significant, though variable, element of total health establishment expenditure. Just as recurrent expenditure is broken down into a number of major categories to enable a proper analysis of health expenditure at the national level, so capital expenditure is to be broken down into a number of major categories. Capital expenditure in the context of hospitals and closely related establishments is a relatively undeveloped area. Nevertheless, there is a considerable interest in health establishment capital expenditure data at the national level from many different potential users.
