

Person—year of first arrival in Australia, date YYYY

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Year of arrival in Australia

METEOR identifier: 269929

Registration status:

- [Community Services \(retired\)](#), Standard 01/03/2005
- [Disability](#), Standard 13/08/2015
- [Health](#), Standard 04/05/2005
- [Homelessness](#), Standard 23/08/2010
- [Housing assistance](#), Standard 23/08/2010

Definition: The year a person (born outside of Australia) first arrived in Australia, from another country, with the intention of staying in Australia for one year or more.

Data Element Concept: [Person—year of first arrival in Australia](#)

Value domain attributes

Representational attributes

Representation class: Date

Data type: Date/Time

Format: YYYY

Maximum character length: 4

Data element attributes

Collection and usage attributes

Collection methods: Actual year of arrival in Australia.

Recommended question:

In what year did you/the person first arrive in Australia to live here for one year or more?

(Write in the calendar year of arrival or mark the box if here less than one year)

Calendar year of arrival

Will be here less than one year

It is anticipated that for the majority of people their response to the question will be the year of their only arrival in Australia. However, some respondents may have multiple arrivals in Australia. To deal with these cases in self-enumerated collections, an instruction such as 'Please indicate the year of first arrival only' should be included with the question.

While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or community service, the information may be ascertained using different means. However, the recommended question should be used wherever practically possible.
