Collection and usage attributes

Guide for use: A pregnancy resulting in multiple births should be counted as once pregnancy.

In multiple pregnancies with more than one type of outcome, the pregnancies should be recorded in the following order:

- all live births
- stillbirth
- spontaneous abortion
- induced abortion
- ectopic pregnancy

Where the outcome was one stillbirth and one live birth, count as stillbirth.

If a previous pregnancy was a hydatidiform mole, code as spontaneous or induced abortion (or rarely, ectopic pregnancy), depending on the outcome.

Comments: The number of previous pregnancies is an important component of the woman's reproductive history. Parity may be a risk factor for adverse maternal and perinatal outcomes.
