Birth—birth weight, total grams NNNN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Infant weight, neonate, stillborn
METEOR identifier:	269938
Registration status:	Health , Superseded 02/08/2017 Tasmanian Health , Superseded 03/07/2020
Definition:	The first weight, in grams, of the live-born or stillborn baby obtained after birth, or the weight of the neonate or infant on the date admitted if this is different from the date of birth.
Data Element Concept:	Birth—birth weight
Value Domain:	Total grams NNNN

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	NNNN
Maximum character length:	4
Unit of measure:	Gram (g)

Data element attributes

Collection and usage attributes

Guide for use:	<p>For live births, birthweight should preferably be measured within the first hour of life before significant postnatal weight loss has occurred. While statistical tabulations include 500 g groupings for birthweight, weights should not be recorded in those groupings. The actual weight should be recorded to the degree of accuracy to which it is measured.</p> <p>In perinatal collections the birthweight is to be provided for liveborn and stillborn babies.</p> <p>Weight on the date the infant is admitted should be recorded if the weight is less than or equal to 9000g and age is less than 365 days.</p>

Implementation in Data Set	Perinatal NMDS
----------------------------	--------------------------------

Specifications:

[Health](#), Superseded 06/09/2006

Implementation start date: 01/07/2006

Implementation end date: 30/06/2007

DSS specific information:

For the provision of state and territory hospital data to Commonwealth agencies this metadata item must be consistent with diagnoses and procedure codes for valid grouping.

Weight is an important indicator of pregnancy outcome, is a major risk factor for neonatal morbidity and mortality and is required to analyse perinatal services for high-risk infants.

This metadata item is required to generate Australian National Diagnosis Related Groups.

[Perinatal NMDS](#)
