Birth event—labour onset type, code N

Identifying and definitional attributes

Metadata item type: Data Element
Short name: Onset of labour

METEOR identifier: 269942

Registration status: Health, Superseded 07/03/2014

Definition: The manner in which labour started in a birth event, as represented by a code.

Data Element Concept: Birth event—labour onset type

Value Domain: Onset of labour code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

Value Meaning

Permissible values: 1 Spontaneous
2 Induced
3 No labour

Supplementary values: 4 Not stated

Collection and usage attributes

Guide for use: Labour commences at the onset of regular uterine contractions, which act to

produce progressive cervical dilatation, and is distinct from spurious labour or pre-

labour rupture of membranes.

If prostaglandins were given to induce labour and there is no resulting labour until

after 24 hours, then code the onset of labour as spontaneous.

CODE 3 No labour

Can only be associated with a caesarean section.

Implementation in Data Set Perinatal NMDS **Specifications:**

Health, Superseded 06/09/2006

Implementation start date: 01/07/2006 Implementation end date: 30/06/2007

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

Perinatal NMDS

Health, Superseded 07/12/2005 Implementation start date: 01/07/2005 Implementation end date: 30/06/2006

Perinatal NMDS 2007-2008

Health, Superseded 05/02/2008 Implementation start date: 01/07/2007 Implementation end date: 30/06/2008

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

Perinatal NMDS 2008-2010

Health, Superseded 02/12/2009 Implementation start date: 01/07/2008 Implementation end date: 30/06/2010

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

Perinatal NMDS 2010-2011

Health, Superseded 21/12/2010 Implementation start date: 01/07/2010 Implementation end date: 30/06/2011

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

This item is collected for the mother only.

Perinatal NMDS 2011-12

Health, Superseded 07/03/2012 Implementation start date: 01/07/2011

Implementation end date: 30/06/2012

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

This item is collected for the mother only.

Perinatal NMDS 2012-13

Health, Superseded 07/02/2013

Implementation start date: 01/07/2012 Implementation end date: 30/06/2013

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

This item is collected for the mother only.

Perinatal NMDS 2013-14

<u>Health</u>, Superseded 07/03/2014 Implementation start date: 01/07/2013

Implementation start date: 01/07/2013

DSS specific information:

How labour commenced is closely associated with method of birth and maternal and neonatal morbidity. Induction rates vary for maternal risk factors and obstetric complications and are important indicators of obstetric intervention.

This item is collected for the mother only.

Implementation in Indicators:

Used as Numerator

National Core Maternity Indicators: PI 05-Induction of labour for selected women giving birth for the first time (2013)

Health, Superseded 02/02/2016

Used as Disaggregation

National Core Maternity Indicators: PI 04-Apgar score of less than 7 at 5 minutes for births at or after term (2013)

Health, Superseded 02/02/2016

National Core Maternity Indicators: PI 06-Caesarean section for selected women giving birth for the first time (2013)

Health, Superseded 02/02/2016

National Core Maternity Indicators: PI 09-General anaesthetic for women giving birth by caesarean section (2013)

Health, Superseded 02/02/2016
