

Person—labour force status, acute hospital and private psychiatric hospital admission code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Employment status (admitted patient)
METEOR identifier:	269948
Registration status:	<ul style="list-style-type: none">• Health, Standard 01/03/2005
Definition:	Self-reported employment status of a person, immediately prior to admission to an acute or private psychiatric hospital, as represented by a code.
Context:	The Australian Health Ministers' Advisory Council Health Targets and Implementation Committee (1988) identified socioeconomic status as the most important factor explaining health differentials in the Australian population. The committee recommended that national health statistics routinely identify the various groups of concern. This requires routine recording in all collections of indicators of socioeconomic status. In order of priority, these would be: employment status, income, occupation and education.
Data Element Concept:	Person—labour force status

Data element attributes

Collection and usage attributes

Collection methods:

In practice, this metadata item and current or last occupation could probably be collected with a single question, as is done in Western Australia:

Occupation?

For example:

- housewife or home duties
- pensioner miner
- tree feller
- retired electrician
- unemployed trades assistant
- child
- student
- accountant

However, for national reporting purposes it is preferable to distinguish these two data items logically.
