Collection and usage attributes

Guide for use:

Establishments are coded into self reporting groupings in the public and private sectors. This can be seen in the code list for medical practitioners.

Minor variations in ordering of sequence and disaggregation of the principal categories will be profession-specific as appropriate; where a more detailed set of codes is used, the essential criterion is that there should not be an overlap of the detailed codes across the Australian and New Zealand Standard Industrial Classification category definitions.

Note:

Public psychiatric hospitals are non-acute care facilities, whereas private psychiatric hospitals are acute care facilities. To minimise the possibility of respondent confusion and mis-reporting, public psychiatric hospitals are included in the grouping for acute care public hospitals.
