Elective surgery waiting list episode—extended wait patient indicator, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Extended wait patient
METEOR identifier:	269964
Registration status:	Health , Standard 01/03/2005
Definition:	Whether a patient is an extended wait patient, as represented by a code.
Data Element Concept:	Elective surgery waiting list episode—extended wait patient indicator
Value Domain:	Extended wait patient indicator code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Extended wait patient
	2	Other patient

Data element attributes

Collection and usage attributes

Guide for use:	A patient is classified as an extended wait patient if the patient is in clinical urgency category 3 at the time of admission or at a census time and has been waiting for the elective surgery for more than one year.
Comments:	This metadata item is used to identify clinical urgency category 3 patients who had waited longer than one year at admission or have waited longer than one year at the time of a census. An extended wait patient is not an overdue patient as there is no maximum desirable waiting time specified for patients in clinical urgency category 3 as they have been assessed as not having a clinically urgent need for the awaited procedure.
