Data element attributes

Collection and usage attributes

Guide for use:	This metadata item should always be recorded as an 8 digit valid date comprising day, month and year. Year should always be recorded in its full 4 digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example if an agency receives a client referral on July 1 2000 the Referral—referral receipt date, DDMMYYYY should be recorded as 01072000 as specified in the representational layout.
Collection methods:	Can be collected at initial referral of a client to an agency or at each referral, although this should be done consistently within a collection. Individual collections will also need to determine what constitutes a referral for their purposes (e.g. Is it only formal referrals that are considered, or are self-referral counted as a referral also etc).
