# Non-admitted patient emergency department service episode—waiting time (to service delivery), total minutes NNNNN

# Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Emergency department waiting time to service delivery

METEOR identifier: 270007

Registration status: Health, Superseded 22/12/2009

**Definition:** The time elapsed in minutes for each patient from presentation in the emergency

department to a service occurrence of a specific event related to service delivery.

Data Element Concept: Non-admitted patient emergency department service episode—waiting time

Value Domain: <u>Total minutes NNNNN</u>

## Value domain attributes

# Representational attributes

Representation class: Total

Data type: Number

Format: NNNNN

Maximum character length: 5

**Unit of measure:** Minute (m)

### Data element attributes

## Collection and usage attributes

Guide for use: Calculated from date and time of service event minus date and time patient

presents. Although triage category 1 is measured in seconds, it is recognised that

the data will not be collected with this precision.

**Comments:** It is recognised that at times of extreme urgency or multiple synchronous

presentations, or if no medical officer is on duty in the emergency department, this

service may be provided by a nurse.

### Source and reference attributes
