Birth event—labour induction type, code N

Exported from METEOR (AIHW's Metadata Online Registry)

Birth event—labour induction type, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Type of labour induction
METEOR identifier:	270037
Registration status:	Health, Superseded 12/12/2018
Definition:	Method used to induce labour, as represented by a code.
Data Element Concept:	Birth event—labour induction type
Value Domain:	Labour induction code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	**Meaning**
Permissible values:	0	None
	1	Oxytocin
	2	Prostaglandins
	3	Artificial rupture of membranes (ARM)
	4	Other

Data element attributes

Collection and usage attributes

Guide for use:	More than one method of induction can be recorded, except where 0=none applies.
Comments:	Type of induction determines the progress and duration of labour and may influence the method of delivery and the health status of the baby at birth.

Source and reference attributes

Submitting organisation:	National Perinatal Data Development Committee
