Collection and usage attributes

Guide for use: For community health care, outreach services and services provided via telephone or telehealth, this may be the time at which the service provider presents to the patient or the telephone/telehealth session commences.

The time of patient presentation at the [emergency department](#) is the earliest occasion of being registered clerically or triaged.

The time that the patient presents is not necessarily:

- the listing time for care (see listing date for care for an analogous concept), nor
- the time at which care is scheduled to be provided, nor
- the time at which commencement of care actually occurs (for admitted patients see admission time, for hospital non-admitted patient care and community health care see service commencement time).
