	Value	**Meaning**
Permissible values:	1	Patient present with or without carer(s)/relative(s)
	2	Carer(s)/relative(s) of the patient only

Data element attributes

Collection and usage attributes

Guide for use:	A service event is regarded as having occurred when a consultation occurs between their carer/relative and a service provider at an appointment when the patient is not present, provided that the carer/relative is not a patient in their own right for the service contact. Where both are patients, it is considered that service events have been provided for the person(s) in whose medical record the service event is noted.
