Collection and usage attributes

Guide for use:	<p>It should be noted that only usual residents of a household are considered when describing and categorising households by Household type. Visitors to a household are, by definition, excluded from the household. Usual residence of members of a household is defined as '...that address at which the person has lived or intends to live for a total of 6 months or more' (Census Dictionary 1996).</p> <p>Other households, including multiple family households may be broken down further to show households with only family members present and those with non-family members present. A family household with only family members present is a household where every individual forms a familial relationship to one of the families belonging to the household. This relates to the ABS Household type definition.</p> <p>Household composition is not used for the Commonwealth State Housing Agreement proxy occupancy standard. Refer instead to Household—household group, code N.</p>
Comments:	For the ABS the household is analysed on the basis of the existence or non-existence of family structure and the presence of unrelated household members, rather than on the basis of sex or age, for example
