<b>Data Element Concept:</b>	<a href="#">Establishment—number of individual session occasions of service for non-admitted patients</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Total
<b>Data type:</b>	Number
<b>Format:</b>	N[NNNNNN]
<b>Maximum character length:</b>	7
<b>Unit of measure:</b>	Occasion of service

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	Emergency patients and outpatients are persons who receive non-admitted care. Individual non-admitted care is care provided to a person who receives direct care within the <a href="#">emergency department</a> or other designated clinics within the hospital and who is not formally admitted at the time when the care is provided. A person who first contacts the hospital and receives non-admitted care, for example through the emergency department, and is subsequently admitted should have both components of care enumerated separately.
<b>Comments:</b>	A group is defined as two or more patients receiving a service together where all individuals are not members of the same family. Family services are to be treated as occasions of service to an individual.
