Dwelling—construction completion date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Date of construction (completion)
METEOR identifier:	270242
Registration status:	Housing assistance , Retired 01/05/2013
Definition:	The date on which the construction of a dwelling is completed and the dwelling is considered available for tenancy.
Data Element Concept:	Dwelling—construction completion date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

Data element attributes

Collection and usage attributes

Guide for use:	This metadata item should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, July 1 2002 should be recorded as 01072002. If day and month is unknown the date is assumed to be 1 January of the corresponding year. The date the certificate of occupancy was issued can be used to determine the <i>Dwelling-construction completion date, DDMMYYYY</i>.
