Value Domain:	Total attendances N[NNNN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNN]
Maximum character length:	5
Unit of measure:	Attendance

Data element attributes

Collection and usage attributes

Comments:	<p>This metadata item is derived from components that are not currently specified in METeOR, but which are recorded in various ways by hospitals and/or outpatient departments. Examples include identifiers of individual consultations/visits, diagnostic tests, etc.</p> <p>Required to measure adequately non-admitted patient services in psychiatric hospitals and alcohol and drug hospitals.</p> <p>Difficulties were envisaged in using the proposed definitions of an individual or group occasion of service for clients attending psychiatric day care centres. These individuals may receive both types of services during a visit to a centre.</p>
