Episode of admitted patient care—number of days of hospital-in-the-home care, total {N[NN]}

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of days of hospital-in-the-home care
METEOR identifier:	270305
Registration status:	Health , Superseded 25/01/2018
Definition:	The number of hospital-in-the-home days occurring within an episode of care for an admitted patient.
Data Element Concept:	Episode of admitted patient care—number of days of hospital-in-the-home care
Value Domain:	Total days {N[NN]}

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	{N[NN]}
Maximum character length:	3
Unit of measure:	Day

Data element attributes

Collection and usage attributes

Guide for use:	The rules for calculating the number of hospital-in-the-home days are outlined below: • The number of hospital-in-the-home days is calculated with reference to the date of admission, date of separation, leave days and any date(s) of change between hospital and home accommodation; • The date of admission is counted if the patient was at home at the end of the day; • The date of change between hospital and home accommodation is counted if the patient was at home at the end of the day; • The date of separation is not counted, even if the patient was at home at the end of the day; • The normal rules for calculation of patient days apply, for example in relation to leave and same day patients.
Comments:	Number of days of hospital-in-the-home care data will be collected from all states and territories except Western Australia from 1 July 2001. Western Australia will begin to collect data from a later date.
