Patient—previous specialised treatment, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Previous specialised treatment
METEOR identifier:	270374
Registration status:	Health , Standard 01/03/2005
Definition:	Whether a patient has had a previous admission or service contact for treatment in the specialty area within which treatment is now being provided, as represented by a code.
Data Element Concept:	Patient—previous specialised treatment
Value Domain:	Previous specialised treatment code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
Permissible values:	Value	Meaning
	1	Patient has no previous admission(s) or service contact(s) for the specialised treatment now being provided
	2	Patient has previous hospital admission(s) but no service contact(s) for the specialised treatment now being provided
	3	Patient has previous service contact(s) but no hospital admission(s) for the specialised treatment now being provided
	4	Patient has both previous hospital admission(s) and service contact(s) for the specialised treatment now being provided
Supplementary values:	5	Unknown/not stated

Collection and usage attributes

Guide for use:	CODE 1 Patient has no previous admission(s) or service contact(s) for the specialised treatment now being provided Use this code for admitted patients, whose only prior specialised treatment contact was the service contact that referred the patient for admission. CODES 2-4 These codes include patients who have been seen at any time in the past within the speciality within which the patient is currently being treated (mental health or palliative care), regardless of whether it was part of the current episode or a previous admission/service contact many years in the past. Use these codes regardless of whether the previous treatment was provided within the service in which the person is now being treated, or another equivalent specialised service (either institutional or community-based). CODE 2 Patient has previous hospital admission(s) but no service contact(s) for the specialised treatment now being provided CODE 3 Patient has previous service contact(s) but no hospital admission(s) for the specialised treatment now being provided CODE 4 Patient has both previous hospital admission(s) and service contact(s) for the specialised treatment now being provided
-----------------------	---

Data element attributes

Collection and usage attributes

Comments:	This metadata item was originally developed in the context of mental health institutional care data development (originally metadata item Problem status and later First admission for psychiatric treatment). More recent data development work, particularly in the area of palliative care, led to the need for this item to be re-worded in more generic terms for inclusion in other data sets. For palliative care, the value of this data element is in its use in enabling approximate identification of the number of new palliative care patients receiving specialised treatment. The use of this data element in this way would be improved by the reporting of this data by community-based services.
