Service provider organisation—number of service operation days (7 day period), total N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Service operation days
METEOR identifier:	270375
Registration status:	Community Services (retired) , Superseded 02/05/2006
Definition:	The actual number of days per week that the agency is open for the provision of service(s) in a reference week.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Service provider organisation—number of service operation days
METEOR identifier:	269805
Registration status:	Community Services (retired) , Standard 01/03/2005 Health , Standard 07/12/2011 Disability , Standard 07/10/2014 Indigenous , Standard 13/03/2015
Definition:	The actual number of days during a specified period that the agency is usually open for the provision of services.
Object class:	Service provider organisation
Property:	Number of service operation days

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

Value domain attributes

Identifying and definitional attributes

Value domain:	Total service operation days N
METEOR identifier:	270878
Registration status:	Community Services (retired) , Superseded 02/05/2006
Definition:	Total number of service operation days.

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Supplementary values:	9	Not stated/inadequately described

Unit of measure: Day

Data element attributes

Collection and usage attributes

Guide for use: Valid numbers are 1 to 7.

Record whole numbers only for the total number of days per week that the outlet provides any service to clients on. If an outlet provides one instance or more of service to one or more clients on a particular day, it is counted as operating on that day, regardless of the amount of time that it operates. The service must be provided by the outlet but not necessarily from its physical setting. For example home care that is arranged by an outlet to occur on a particular day on which the office of that outlet is not open still counts as a day of operation for that service outlet.

When an agency operates on a day but does not provide services to clients on that day it should still be counted as a day of operation. For example, an agency may be open for service, such as a drop in service, but no clients are seen.

Collection methods: This data should be collected for all the types of services that an outlet offers.

However, it can also be collected for different types of services within data collections, sectors or agencies. For example it may be useful to know on how many days per week a certain type of service (such as counselling) is offered.

For this metadata item to be nationally comparable though the number of days per week that the service operates providing any service needs to be collected.

For agencies or collections requiring further detail, this data could be collected within a range of other metadata items such as the actual days of the week that certain services are offered.

When collected in conjunction with 'Community services agency—number of service operation hours (24 hour period), total NN', and 'Community services agency—number of service operation weeks (calendar year), total NN' can provide useful information on patterns of service delivery.
