Morphology of cancer code (ICDO-3) NNNN/N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	270756
Registration status:	Health , Superseded 07/12/2011
Definition:	The ICDO (3rd edition) code set representing the histology and behaviour of cancer tissue.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	NNNN/N
Maximum character length:	5

Collection and usage attributes

Guide for use:	ICDO morphology describes histology and behaviour as separate variables, recognising that there are a large number of possible combinations. In ICDO, morphology is a 4-digit number ranging from 8000 to 9989, and behaviour is a single digit which can be 0, 1, 2, 3, 6 or 9. Record morphology codes in accordance with ICDO coding standards. Use the 5th-digit to record behaviour. The 5th-digit behaviour code numbers used in ICDO are listed below: 0 Benign 1 Uncertain whether benign or malignant • borderline malignancy • low malignant potential 2 Carcinoma in situ • intraepithelial • non-infiltrating • non-invasive 3 Malignant, primary site 6 Malignant, metastatic site • malignant, secondary site 9 Malignant, uncertain whether primary or metastatic site
