Health establishment accrual accounting capital expenditure code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	270937
Registration status:	Health , Standard 01/03/2005
Definition:	A code set representing capital expenditure categories relevant to health establishments.
Context:	Health expenditure: Capital expenditure is a significant, though variable, element of total health establishment expenditure. Just as recurrent expenditure is broken down into a number of major categories to enable a proper analysis of health expenditure at the national level, so capital expenditure is to be broken down into a number of major categories. Capital expenditure in the context of hospitals and closely related establishments is a relatively undeveloped area. Nevertheless, there is a considerable interest in health establishment capital expenditure data at the national level from many different potential users.
