Comments: Position or job classifications are specific to each profession and may differ by State or Territory. The classifications above are simplified so that comparable data presentation is possible and possible confounding effects of enterprise specific structures are avoided. For example, for medicine, the job classification collected in the national health labour force collection is very broad. State/Territory health authorities have more detailed classifications for salaried medical practitioners in hospitals. These classifications separate interns, the resident medical officer levels, registrar levels, career medical officer positions, and supervisory positions including clinical and medical superintendents. Space restrictions do not at present permit these classes to be included in the National Health Labour Force Collection questionnaire.
