|                         |  | Effective date: | 01-MAR-05  |
| Definition:             | An indicator (yes / no) to identify the non-direct patient care activity of teaching for a particular establishment. This is where teaching (associated with a university) is a major program activity of the establishment. It is primarily intended to relate to teaching hospitals affiliated with universities providing undergraduate medical education as advised by the relevant State health authority.  |                 |            |
| Context:                | Health services: the non-direct care activity of teaching can involve the consumption of considerable resources. In comparisons of cost in relation to establishment output, it is important to be aware of particular establishments which are devoting substantial resources to activities not relating to output as measured in terms of either in-patient bed days or outpatient occasions of service. Teaching can be one of the variables in any regression analysis undertaken. |                 |            |
|                         | In this context, teaching relates to teaching hospitals affiliated with universities providing undergraduate medical education as advised by the relevant State health authority.  |                 |            |
