Guide For Use: This data domain is for use in injury surveillance purposes only, when it is not possible to use a complete ICD-10-AM code (e.g. Non-admitted patients in emergency departments). Select the item which best characterises the circumstances of the injury, on the basis of the information available at the time it is recorded. If two or more categories are judged to be equally appropriate select the one that comes first in the code list. The External cause - non-admitted patient group must always be accompanied by an External cause - human intent code (see data element External cause - human intent).
