
Last service contact date

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NCSDD
Knowledgebase ID: 000513 Version number: 2
Metadata type: DATA ELEMENT
Registration Authority: NCSIMG Admin status: SUPERSEDED
Effective date: 01-MAR-05
Definition: The date on which a service episode was completed.
Context: This data element may be used in the calculation of measures of periods of support and duration of assistance.

Relational and Representational Attributes

Datatype: Numeric
Representational form: CODE
Representation layout: DDMMYYYY
Minimum Size: 8
Maximum Size: 8
Data Domain: NOVAL Valid dates
Guide For Use: Due to the considerable variation in the types of services provided in the community services sector, it is not possible at this stage to define in generic terms what will constitute completion of a service episode. Individual collections should however define what constitutes completion for their own purposes.
This data element should always be recorded as an 8 digit valid date comprising day, month and year. Year should always be recorded in its full 4 digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example if a service episode is completed on July 1 2000 the Date assistance completed should be recorded as 01072000 as specified in the representational layout.
Collection Methods: Last service contact date must be related to a particular service episode. For each separate service episode a separate 'Last service

contact date' should be recorded.

Related metadata: supersedes previous data element Date assistance completed
version 1
relates to the data element concept Service episode version 1
