
Participation satisfaction level

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NCSDD
Knowledgebase ID: 000589 Version number: 1
Metadata type: DATA ELEMENT
Registration Authority: NCSIMG Admin status: SUPERSEDED
Effective date: 01-SEP-03

Definition: A person's level of satisfaction with participation in relation to their current life goals. Participation is the nature and extent of a person's involvement in life situations in relation to Health Conditions, Body Functions and Structures, Activities and Environmental Factors. Participation restrictions are problems in the manner or extent of involvement in life situations.

Context: The individual's experience of life situations may be described by this data element in conjunction with 'Participation areas' and 'Participation extent'.
This data element may contribute to the definition of disability and give an indication of the experience of disability from a personal perspective.

Relational and Representational Attributes

Datatype: Numeric
Representational form: CODE
Representation layout: N
Minimum Size: 1
Maximum Size: 1

Data Domain: 0	Not applicable
1	High satisfaction with participation
2	Moderate satisfaction with participation
3	Moderate dissatisfaction with participation
4	Extreme dissatisfaction with participation
5	No participation
	No participation
6	No participation and none desired

Guide For Use: Participation and participation restrictions are classified in the ICIDH-2, 1999. Refer to the Information Annexe - Disability for further details.

This data element gives a rating of the degree of satisfaction experienced in participation, in relation to a person's current life goals. Choice and autonomy are key aspects of satisfaction and quality of life for all people. Satisfaction with participation may also, be affected by duration, frequency, manner or outcome of participation. Duration and frequency may be less than or more than desired by the individual.

Not applicable is recorded when participation in a life situation is either not relevant, such as military service for an infant.

High satisfaction with participation is recorded if a person is involved in the specified life situation as he or she wishes, to fulfil his or her current life goals in terms of duration, frequency, manner and outcome.

Moderate satisfaction with participation is recorded if the person is reasonably satisfied with their participation in this life situation. This could occur if one of the criteria (duration, frequency, manner or outcome) is not fulfilled and that criterion is not critical to the person's goals. For example, the person does not participate in the specified life situation as frequently as wished, but the other criteria are met and the frequency is not so affected that it is critical to the person's satisfaction.

Moderate dissatisfaction with participation is recorded if two or three criteria (duration, frequency, manner or outcome) are not fulfilled, but are not so badly affected, in relation to the person's goals in that life area, that the person is extremely dissatisfied. For example, a person is able to participate in work, but is placed in supported employment rather than employment in the open labour market. This is not in line with the person's goals, so the manner and outcome of the participation are not fulfilled.

Extreme dissatisfaction with participation is recorded when all criteria (duration, frequency, manner and outcome) are not fulfilled for the specified life situation, or where any of the criteria are so badly affected in relation to the person's goals that they consider themselves to be extremely dissatisfied with this life area. An example of the latter would arise when a person is extremely dissatisfied with participation in interpersonal activities because his/her goal in terms of duration of visits is never fulfilled, although the other three criteria (frequency, manner and outcome) may be fulfilled.

No participation is recorded when the person does not participate in this life situation in line with his or her own goals,

i.e. in an area where they wish to participate.

No participation and none desired is recorded when the person does not participate in this area, but does not wish to do so.

Not stated/inadequately described is recorded when there is insufficient information to record satisfaction with participation in any other category.

Collection Methods: This coding is used in conjunction with specified Participation areas. For example a person's 'moderate satisfaction with participation in exchange of information'.
The area in which an individual experiences a participation restriction is indicated in the data element 'Participation areas'. The extent of and level of satisfaction with participation in a given area are indicated in 'Participation extent' and 'Participation-satisfaction level'

Administrative Attributes

Source Document: ICIDH-2 Beta-2 draft, 1999

Source Organisation: World Health Organization

Comments: Disability is a multi-dimensional and complex concept which, has been described in three dimensions (WHO, 1999): Body structures and functions/impairments, Activity/activity limitation and Participation/participation restriction. Environmental factors interact with all dimensions of functioning and disability. All disability is associated with a health condition, disease or injury. The data elements relating to disability are based on the draft ICIDH-2, Beta-2, 1999, as the best available conceptualisation

suitable to the purpose. The Beta-2 draft is subject to systematic field trials and further consultation until 2001. Use of the ICIDH-2 has not been endorsed by WHO Member States. Endorsement by the World Health Assembly is scheduled to be sought in 2001. Further information on the ICIDH-2 can be found on the WHO website: <http://www.who.ch/icidh>
For further information on disability see the Information Annexes-Disability
