
Date of each visit to provide services

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary:

Knowledgebase ID: 000616

Version number: 2

Metadata type: DATA ELEMENT

Registration Authority: ACCNS

Admin status: DRAFT

Authority:

Effective date: 01-JUL-00

Definition: The dates on which service is provided to a person.

Context: Recording the date on which each visit is made enables the calculation of the total number of visits. It also allows for a description or profile of service utilisation by a person or persons during an episode of care. For example, in some instances a person may receive multiple visits on the one date, while visits to other clients may be separated by weeks or even months.

Relational and Representational Attributes

Datatype: Numeric

Representational form: DATE

Representation layout: DDMMYYYY

Minimum Size: 10

Maximum Size: 10

Data Domain: NOVAL Valid date

Guide For Use: The date of delivery of service requires that a record of the date is kept on each occasion of service, including the same date where multiple visits are made on one day.

Administrative Attributes

Source Document:

Source Organisation: Australian Council of Community Nursing Services Inc.

Comments: This item has been introduced into Version 2.0 to enable more detailed measurement of resource utilisation. This item also allows for detailed costing analyses (or in some cases levying charges) which require the inclusion of penalty rates applying to weekends

or public holidays.
