
Cessation of service status

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary:

Knowledgebase ID: 000625

Version number: 2

Metadata type: DATA ELEMENT

Registration Authority: ACCNS

Admin status: DRAFT

Authority:

Effective date: 01-JUL-00

Definition: A description of the circumstances at discharge according to whether or not they are in accord with the person's goal of care.

Context: The objective of the item is to qualify the outcome according to whether it was anticipated or otherwise, compensating for the fact that circumstances may occur which are not able to be predicted and which override the goal of care.

Relational and Representational Attributes

Datatype: Numeric

Representational form: CODE

Representation layout: NN

Minimum Size: 1

Maximum Size: 2

Data Domain: 01	Planned
02	Unplanned
99	Not stated/ inadequately described/ not coded

Guide For Use: For cessation of services to be coded as PLANNED, it must be consistent with the care-plan in terms of its timing, place and the outcome.

An UNPLANNED cessation of service is one that is at variance with the planned outcome of care; this includes when the time of cessation of service is sooner or later than anticipated. For example, a nursing goal such as 'admission to institution at planned/appropriate time' would be classified as UNPLANNED if the admission (cessation from the nursing service) occurred sooner or later than the expected time.
