Definition: The reason why a patient is removed from the waiting list

Context: Elective surgery:

Routine admission for the awaited procedure is only one reason why patients are removed from the waiting list. Each reason for removal

provides different information.

These data are necessary to augment census and throughput data. For example, after an audit the numbers of patients on a list would be expected to reduce. If an audit were undertaken immediately prior to a census the numbers on the list may appear low and not in keeping with the number of additions to the list and patients

admitted from the list.

procedure in this hospital

2 Admitted as an emergency patient for awaited

procedure in this hospital

3 Could not be contacted (includes patients who have

died while waiting whether or not the cause of

death was related to the condition requiring treatment)

- 4 Treated elsewhere for awaited procedure, but not as a patient of this hospital's waiting list
- Surgery not required or declined 5
- Not known

Guide For Use: Patients undergoing the awaited procedure whilst admitted for another reason are to be coded as code 1.

> Code 2 identifies patients who were admitted ahead of their normal position in the queue because the condition requiring treatment deteriorated whilst waiting. Admission as an emergency patient could also be due to other causes such as inappropriate urgency rating, delays in the system, or unpredicted biological variation.

Codes 3-5 provide an indication of the amount of clerical audit of the waiting lists. Code 4 gives an indication of patients treated in other hospitals for the awaited procedure. The procedure may have been performed as an emergency or as an elective procedure.

Code 9 identifies patients removed from the waiting list for reasons unknown.
