is composed of State/Territory identifier version 2 is composed of Region code version 2 is composed of Establishment number version 3 is composed of Establishment sector version 3 has been superseded by Establishment identifier version 4

Administrative Attributes

Source Document:

Source Organisation: National Health Data Committee

Comments: A residential establishment is considered to be separately administered if managed as an independent institution for which there are financial, budgetary and activity statistics. For example, if establishment-level data for components of an area health service are not available separately at a central authority, this is not grounds for treating such components as a single establishment unless such data are not available at any level in the health care system.

This item is now being used to identify hospital contracted care.

The use of this item will lead to reduced duplication in reporting patient activity and will enable linkage of services to one episode of care.
