Datatype: Alphanumeric
Representational form: CODE
Representation layout: ANN(.N.NN)
Minimum Size: 3
Maximum Size: 8
Data Domain: NOVAL A data domain appropriate for a particular collection should be mappable to the service activities classification in the National Classifications of Community Services Version 2.
Reference through:
<http://www.aihw.gov.au/publications/hwi/nccsv2/index.html>
Guide For Use: Service activities should be collected according to the lower level of coding in the NCCS V2.
To meet program or service specific needs, the categories used in individual data collections may be more detailed than those in the service activities classification of the NCCS V2, but they should always be mappable to categories in the NCCS V2.
Collection Methods: Can be collected for the main type of service provided or all types on either an individual client event or episode of care or reflect general availability. In some collections this item may be more narrowly defined to include only the services that are relevant to
