
Service delivery setting

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NCSDD
Knowledgebase ID: 000539 Version number: 3
Metadata type: DATA ELEMENT
Registration Authority: NCSIMG Admin status: SUPERSEDED
Effective date: 01-MAR-05

Definition: The type of physical setting in which a service activity is actually provided or could be provided to a client, irrespective of whether or not this is the same as the usual location of the service providing agency.

Context: This element is used, in conjunction with other data elements about service provision, to obtain a more detailed appraisal of service availability and how services are provided. At the broadest level, this data element should provide a measure of the extent to which services are provided to clients in their own homes, in community settings or centre-based facilities, residential care facilities or other settings.

Relational and Representational Attributes

Datatype: Alphanumeric
Representational form: CODE
Representation layout: AN.N.NN
Minimum Size: 2
Maximum Size: 7

Data Domain: NOVAL A data domain appropriate for a particular collection should be mappable to the service settings classification in the National Classifications of Community Services Version 2.
Reference through:
<http://www.aihw.gov.au/publications/hwi/nccsv2/index.html>

Guide For Use: Service delivery settings should be collected according to the lower level of coding in the NCCS V2.

To meet program or service specific needs, the categories used in individual data collections may be more detailed than those in the settings classification of the NCCS, but they should always be mappable to categories in the NCCS V2.

Related metadata: relates to the data element concept Agency version 1
