
Service delivery setting

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NCSDD
Knowledgebase ID: 000539 Version number: 2
Metadata type: DATA ELEMENT
Registration Authority: NCSIMG Admin status: SUPERSEDED
Effective date: 01-SEP-03

Definition: The type of physical setting in which a service(s) is actually provided to a client, irrespective of whether or not this is the same as the usual location of the service providing agency.

Context: This element is used, in conjunction with other data elements about service provision, to obtain a more detailed appraisal of service availability and how services are provided. At the broadest level, this data element should provide a measure of the extent to which services are provided to clients in their own homes, in community settings or centre-based facilities, residential care facilities or other settings.

Relational and Representational Attributes

Datatype: Numeric
Representational form: CODE
Representation layout: N
Minimum Size: 1
Maximum Size: 1

Data Domain: 1 Independent living setting
2 Supported household or accommodation setting
