Building/complex sub-unit number

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at http://meteor.aihw.gov.au

Identifying and Definitional Attributes

Data Dictionary: NHDD

Knowledgebase ID: 001007 Version number: 1

Metadata type: DATA ELEMENT

Registration NHIMG Admin status: SUPERSEDED

Authority: Effective date: 01-MAR-05

Definition: The specification of the number or identifier of a building/complex,

marina, etc. to clearly distinguish it from another.

Context: Australian addresses.

Relational and Representational Attributes

Datatype: Alphanumeric

Representational TEXT

form:

Representation AN(6)

layout:

Minimum Size: 0
Maximum Size: 6

Guide For Use: The Building/complex sub-unit number must be recorded with

its corresponding Building/complex unit type - abbreviation.

Where applicable, the number may be followed by an

alphanumeric suffix.

Examples: APT 6 SHOP 3A U 6

Collection Methods: To be collected in conjunction with Building/complex sub-unit

type - abbreviation.

Where a building or other type of unit is present in a complex of such buildings or units, the data elements Building/unit sub-unit type - abbreviation and Building/complex sub-unit number should be used in conjunction in that order. An example can be seen in a shop within a shopping complex. Such a shop could have as part of

its address line the word 'shop' as the type followed by its

identifying 'number' within the complex e.g. '209a'. Thus the words

'Shop 209a' would form part of the Address line.

Related metadata: is a composite part of Address line version 1

relates to the data element Building/complex sub-unit type -

abbreviation version 1
