
Target group

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NHADD
Knowledgebase ID: 001086 Version number: 1
Metadata type: DATA ELEMENT CONCEPT
Admin status: SUPERSEDED Effective date: 01-MAR-05
Definition: The target group is a group of people with a particular characteristic or set of characteristics which a particular program/service seeks to assist. Target groups may relate to population groups or communities, families/households, individuals, organisations or labour force groups. Characteristics may include age, cultural identity, geographic location, specific needs and other relevant characteristics.
Context: Target group is used in describing community services agencies, in service planning and in comparing community needs and service availability.

Relational and Representational Attributes

Datatype:

Administrative Attributes

Source Document: National Classifications of Community Services. Version 2.0.
Source Organisation: Australian Institute of Health and Welfare
Comments: Should be supported by data items delineating the individual characteristics that define the target population, such as Sex, Country of birth, etc.
Note: At the present time very little community services data are classified to target groups but implementations of this classification is under active consideration by the National Community Services Data Committee.
