
Homeless SAAP

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at <http://meteor.aihw.gov.au>

Identifying and Definitional Attributes

Data Dictionary: NHADD
Knowledgebase ID: 000749 Version number: 1
Metadata type: DATA ELEMENT CONCEPT
Admin status: SUPERSEDED Effective date: 13-JUL-03
Definition: A person is homeless if he or she does not have access to safe, secure and stable housing. Hence even if a person has a physical home, they would be considered homeless if:

- they were not safe at home;
- they had no legal right to continued occupation of their home (security of tenure); or
- the home lacked the amenities or resources necessary for living.

Context: There is considerable concern over the number of homeless people in society and the assistance they require. Collecting information on homeless people is problematic, as the concept of 'homelessness' encompasses elements in addition to whether, someone resides in a dwelling or not.

Relational and Representational Attributes

Datatype:
Related metadata: relates to the data element Homeless status SAAP version 1

Administrative Attributes

Source Document: SAAP National Data Collection Collectors Manual, July 1998
Source Organisation: SAAP National Data Collection Agency

Comments: This is the broadest definition of homeless. Further work is underway to define a method of data collection and the data domain required for an additional data element 'Homeless status'. This is required in order to determine households in 'greatest need'.
