Definition: The special needs status of a household receiving housing assistance. The household special categories used for this data element are under development (see Special needs category).
Context: A guiding principle of the 1999 CSHA is that assistance is to be provided to those who most need it, for the duration of their need. Households who most need assistance are defined as those whose needs cannot be met by the private rental market. The Special needs performance indicator measures households most in need in terms of tenants who have special needs that would not find appropriate, affordable and secure housing in the private rental market.
