

2nd subtopic

2nd subtopic below the System administration topic.

Versatile metadata structures

- More information about the new metadata structures can be found in [About metadata](#).
- The [About data standards](#) page outlines data standards and how they are developed.
- While METeOR replaces the Knowledgebase, the old standards are still available through the [Knowledgebase archive](#).

Sophisticated new system

- [Find metadata](#) provides access to a powerful search facility to help find metadata standards in METeOR.
- *My items* provides you with a 'collection point' to keep your items of interest.
- The [Help](#) pages provide user help in areas such as finding, viewing and downloading standards.
- Only metadata developers can create new items and must [login](#) before starting.
