Worker ID

Important note: This is an archived metadata standard from the AIHW Knowledgebase. For current metadata standards and related information please access METeOR, the AIHW's Metadata Online Registry at http://meteor.aihw.gov.au

Identifying and Definitional Attributes

Data Dictionary: NCHSDD

Knowledgebase ID: 000921 Version number: 2

Metadata type: DATA ELEMENT

Registration NCSIMG Admin status: DRAFT

Authority: Effective date: 01-APR-02

Definition: This is the number assigned to uniquely identify each worker in a

child care or preschool service at an outlet.

Context: This ID number uniquely identifies each worker's record reported in

the CS NMDS collection. As a worker may be employed at more than one outlet during the reference week, this ID number will not uniquely identify a worker across all CS NMDS records, only within each outlet. The ID number does not personally identify individual workers. It identifies a record for each worker held by the outlet. During the second stage of the CS NMDS more information about

workers will be included.

Relational and Representational Attributes

Datatype: Numeric

Representational CODE

form:

Representation NNN

layout:

Minimum Size: 1 Maximum Size: 3

Data Domain: NOVAL Number

Collection Methods: Each outlet should allocate a unique Worker ID for each worker in

a child care or preschool service at an outlet during the reference week should be allocated a unique ID number for the purposes of

CS NMDS reporting.

In the first stage of the CS NMDS collection records are only to be

reported for paid primary contact workers.

For mobile services each worker should have one unique number

regardless of how many outlets they work at.

The above information should be reported in this form for outlets reporting disaggregated data.

In some jurisdictions this information may be required to be reported in an aggregate form. This acknowledges that some jurisdictions may be unable to collect at a disaggregated level in the early stages of the CS NMDS collection. In these instances outlets should report the total number of workers at the outlet during the reference week.
