Person—creatine kinase-myocardial band isoenzyme level

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	284895
Registration status:	Health, Standard 04/06/2004
Definition:	A person's creatine kinase-myocardial band (CK-MB) isoenzyme level.
Context:	Health care and clinical settings.

Object Class attributes

Identifying and definitional attributes

Object class:	Person

Definition: A human being.

Collection and usage attributes

Comments:Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human
being, whether man, woman or child'. From 13 March 2018, the definition was
edited by removing the words '...whether man, woman or child' so that a person is
defined as 'A human being'. This amendment was undertaken to align the definition
of a person with the Australian Government Guidelines on the Recognition of Sex
and Gender and the Australian Bureau of Statistics (ABS) Standard for Sex and
Gender Variables, which recognise that there are sex and gender types that are
not exclusively male or female.

Property attributes

Identifying and definitional attributes

Property:	Creatine kinase-myocardial band isoenzyme level
Definition:	The level of creatine kinase-myocardial band (CK-MB) isoenzyme.
Property group:	Assessment event
