

Person—creatine kinase-myocardial band isoenzyme level (measured), total international units N[NNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Creatine kinase MB isoenzyme level (international units)
Synonymous names:	Creatine kinase MB isoenzyme (CK-MB) - measured
METEOR identifier:	284905
Registration status:	<ul style="list-style-type: none">• Health, Superseded 01/10/2008
Definition:	A person's measured creatine kinase-myocardial band (CK-MB) isoenzyme level in international units.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—creatine kinase-myocardial band isoenzyme level
METEOR identifier:	284895
Registration status:	<ul style="list-style-type: none">• Health, Standard 04/06/2004
Definition:	A person's creatine kinase-myocardial band (CK-MB) isoenzyme level.
Context:	Health care and clinical settings.
Object class:	Person
Property:	Creatine kinase-myocardial band isoenzyme level

Value domain attributes

Identifying and definitional attributes

Value domain:	Total international units N[NNN]
METEOR identifier:	284935

Registration status: • [Health](#), Superseded 01/10/2008

Definition: Total number of international units.

Representational attributes

Representation class: Total

Data type: Number

Format: N[NNN]

Maximum character length: 4

Supplementary values:

Value	Meaning
-------	---------

8888	Not measured
------	--------------

9999	Not stated/inadequately described
------	-----------------------------------

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: CODE 8888 if test for CK-MB was not done on this admission.

Measured in different units dependent upon laboratory methodology.

When only one CK-MB level is recorded, this should be the peak level during admission.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare
